

# About TSM Steel

INFORMATION SHEET

We are a division of the Smiths Metal Centres Limited Group

Revision: tsm/about-tsm/04-04-2023

Page: 1 of 1

**TSM Steel** is a new business that sells steel to the UK engineering sector. The division is part of the **Smiths Metal Centres Group**.

The business was originally a sub-branch of Thames Stockholders based in Enfield and was established to offer engineering steels to central and Northern England.

Known originally as 'Thames Midlands', the success of the business resulted in an opportunity to create a new business entity in its own right. The division has now completely broken away from Thames Stockholders and represents an established division with its individual branding.

The **TSM Steel** website forms a blueprint for the branding and marketing focus going forward.

## Market Scope:

**TSM Steel** is the only business in the Smiths Metal Centres Group dedicated to selling engineering steel. The division offers a sizeable stock range in various grades to support general engineering applications throughout the UK.

**TSM Steel** also benefits from the Group's unique resources, including a UKAS Accredited Testing Laboratory and an industry-leading bespoke IT platform.

## Variations:

We supply engineering steels in various shapes dictated by the material grade. We stock bright and black round bars, square bars, flats and hexagons.

## Stock Range:

Our stock portfolio includes:

- Low carbon steels
- Medium carbon steels
- Alloy Steels
- Heat-treated steels
- Tool Steels
- Structural Steels

We stock material in imperial and metric sizes.
